

Recalls, reminders, and cancer screening (including integrated NCSR access) using Bp Premier

For general practices

Train IT Medical

Leading your practice into a digital future

Northern Queensland Primary Health Network (NQPHN) is pleased to invite general practices to a live one-hour webinar with Katrina Otto, Principal and Owner of Train IT Medical.

Katrina is one of Australia's leading Practice Management Consultants and a highly respected, approved medical software trainer.

Learning outcomes

- Develop a systematic approach to bowel, breast, and cervical screening using Bp Premier.
- Build advanced understanding of features within Bp Premier and PenCS relevant to cancer screening including direct access to the National Cancer Screening Register (NCSR).
- Clearly differentiate between preventive health reminders and clinically significant recalls and learn tips for change management and data cleaning.
- Use actions for proactive preventive health management.
- Discuss patient-centred strategies and quality improvement activities designed to improve your practice recall and reminder system.
