Initiate a GP Management Plan **item 721** and Team Care Arrangement **item 723** as appropriate

If your patient has type 2 diabetes and has a GPMP in place, they may be eligible for referral for group diabetes education

If your patient has moderate to severe **asthma**...

Commence an Asthma Annual Cycle of Care and claim **item 2546, 2552, or 2558** (or similar) at end of cycle **OR** do a GP Management Plan and TCA if necessary

If patient has an additional chronic or terminal illness, initiate a GP Management Plan **item 721** and Team Care Arrangement **item 723** as appropriate

This resource must be used in conjunction with the item descriptor and explanatory notes for all items as set out in the Medicare Benefits Schedule (MBS) as claiming conditions apply.

Is your patient eligible for **any health assessments**?

If your patient is over 75 years...	Do an over 75 health assessment
If your patient was a serving member of the Australian Defence Force (ADF)...	Do an Australian Defence Force post-discharge GP health assessment
If your patient is 45–49 years with no diagnosed chronic condition...	Do a 45–49 health check
If your patient is 40–49 years and at 'high risk' of developing diabetes as defined by **ausdrisk**...	Do a type 2 diabetes risk evaluation
If your patient has an intellectual disability...	Do an intellectual disability assessment
If your patient resides in an aged care facility...	Do a comprehensive medical assessment
If your patient is a refugee or humanitarian entrant...	Do a refugee or humanitarian entrant assessment

- Brief health assessment of less than 30 minutes **item 701**
- Standard health assessment lasting more than 30 minutes but less than 45 minutes **item 703**
- Long health assessment lasting more than 45 minutes but less than 60 minutes **item 705**
- Prolonged health assessment lasting more than 60 minutes **item 707**

If your patient has a **mental health issue**...

Prepare a GP Mental Health Treatment Plan **item 2700** (if no MH skills training) or **item 2715** (if MH Skills Training) and review with **item 2712**. For ongoing management of mental health issues **item 2713**

If patient has an additional chronic illness, initiate a GP Management Plan **item 721** and Team Care Arrangement **item 723** as appropriate

Could your patient benefit from a **medication review**?

Organise a **home medication review item 900**

Case conferencing

Organise and coordinate a Case Conference **item 735, 739, or 743**
Participate in a Case Conference **item 747, 750, or 758** with two other health care providers
Consider contributing to multi-disciplinary care plan if requested by another health provider **item 729**

If your patient resides in an **aged care facility**...

Contribute to RACF Care Plan **item 731**
Review after 3–6 months using **item 731**

If your patient also has **complex care needs** necessitating the involvement of at **least 2 other health or care providers**

Your patient is eligible to access allied health

Could your patient be at 'high risk of developing type 2 diabetes? Should your patient be referred to a **lifestyle modification program**?

1. If your patient is of Aboriginal and/or Torres Strait Islander descent and aged 15–54 years, do an Aboriginal and Torres Strait Islander Health Assessment—use **ausdrisk** tool
2. If your patient is 45–49 years with no diagnosed chronic condition, do a 45 year health check—use **ausdrisk** tool
3. If your patient is 40–49 years, use **ausdrisk** tool to determine diabetes type 2 risk. If patient is at 'high risk' do a diabetes type 2 risk evaluation

If your patient is found to be at 'high risk' of developing type 2 diabetes, provide advice and information such as *My health for life* program and/or information and strategies to achieve lifestyle and behaviour changes.
