viral hepatitis & sexual health workforce

Hepatitis C in NSP Settings

Join us for this free workshop to support your role in curing hepatitis C

1 December 2020

9:30am – 12:00pm (AEDT)

Frontline workers in needle and syringe programs (NSP) settings have a crucial and unique role to play in eliminating hep C. Every day, you're talking to people who might be living with hep C. By sharing messages about testing and treatment, you can support people to protect their health.

This course will be delivered in two parts

Part 1 – a 1-hour eLearning component to be completed before the workshop

Part 2 – a 2 hour online workshop building on the eLearning content through case study discussion and referral pathway mapping activities

Learning Objectives:

- Describe risk factors for hep c, enabling discussion with people around prevention and harm reduction
- Describe hep C testing and liver disease assessment
- Recognise the treatment options for hep C
- Identify your local referral pathway for linking people to hep C testing and treatment
- Communicate confidently with people about hep C testing, treatment, and follow-up processes in the NSP
