

Improving data quality using CAT

For practice nurses

Webinar

Northern Queensland Primary Health Network (NQPHN) together with PenCS invite practice nurses to attend a 90-minute webinar with a focus on improving data quality using PenCS clinical auditing tools.

Improving data quality in your practice can help with improving patient care, cleansing your data, increasing practice efficiency, and measuring quality improvement activities.

The session will focus on:

- improving data quality
- recalls and reminders
- Topbar.

Learning outcomes:

- learn how to use CAT4 reports and filters to improve patient data quality in your practice
- learn how to clean up free text diagnosis in patient history (for Best Practice and MedicalDirector users only)
- understand what recalls and reminders are and the benefits of using them
- understand the functionality and benefits of Topbar.

DATE

Tuesday 4 May 2021

TIME

12.30pm–2pm

WHERE

Online webinar via Zoom
A URL link will be sent to participants after completion of the online registration.
