This webinar will:

- provide health professionals with up-to-date knowledge and a practical guide to the most appropriate and effective methods of contraception for patients.

Learning outcomes

By the end of this activity participants will be able to:

- use current best practice for safe prescribing of contraception using the Medical Eligibility Criteria system
- compare contraceptive methods using the Family Planning Alliance Australia contraception efficacy card
- differentiate between IUD options and features available in Australia
- identify appropriate use of contraception to manage stages/conditions such as perimenopause, PCOS and migraine
- identify clinical indications for specialist referral.

Course Accreditation
