

Spirometry training

For practice nurses

Brought to you by the National Asthma Council Australia as part of the Best Practice for Health Professionals Program.

This Spirometry training course provides practice nurses with comprehensive training in the application, measurement, and interpretation of expiratory spirometry in general practice. The six-hour interactive workshop includes a practical, hands-on component to allow participants to apply their new knowledge in a practical setting.

Learning outcomes:

- identify the clinical indications where spirometry is recommended
- demonstrate the ability to correctly perform a spirometry test, using role play and peer review
- interpret spirometry results to differentiate between respiratory conditions, such as asthma and chronic inflammatory lung disease (COPD)
- assess your own practice quality assurance procedures for spirometry.

There are limited places available for this workshop so register early to avoid missing out.

Date

Saturday 4 June 2022
Sunday 5 June 2022

Time

Registration: 8.30am
Program: 9am–3.30pm

Where

Crystalbrook Flynn
68-72 Abbott Street, Cairns
