

715 Health Assessments: Completing more and doing it better

For primary care professionals

Northern Queensland Primary Health Network (NQPHN) invites primary care professionals in the Townsville region to join us for an educational dinner on 715 Health Assessments (HAs) and how to complete more and do it better.

Comprehensive HAs represent the cornerstone of health care for First Nations patients, with general practices being well placed to deliver high quality care. Despite this, challenges exist in the provision of HAs, with barriers impacting both clinicians and patients in getting the best from the item.

We will explore the history, design, and requirements of the HA and assist you in integrating high quality assessments into your clinic's flow.

Learning outcomes:

- demonstrated in-depth understanding of the philosophy behind the HA, its Medicare Benefit Schedule requirements, and associated item numbers
- demonstrated understanding of how-to better structure the HA to provide high quality, culturally safe services to First Nations patients
- demonstrated understanding of referral networks that provide a starting point for a completed HA.

Date

Wednesday 7 December 2022

Time

Registration: 5.30pm
Program: 6pm–8pm
