

National roll-out of Provider Connect Australia is underway

Provider Connect Australia is:

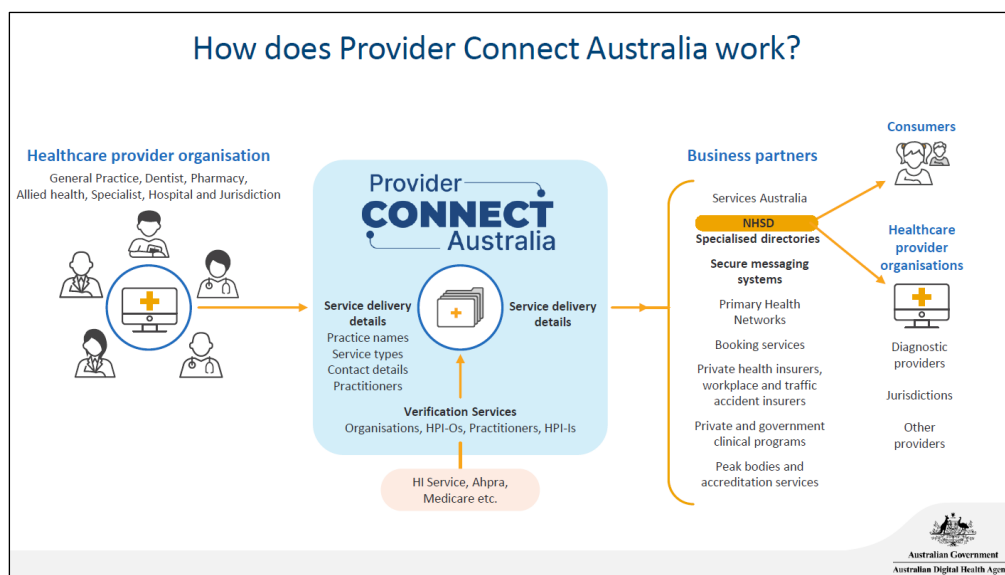

- A fee-free service provided by the Australian Digital Health Agency.
- A tool that connects healthcare providers with their business partners.
- Able to streamline registration and ongoing updates.
- A foundation of a better-connected healthcare system.

For healthcare organisations, once registered with Provider Connect Australia, you or your practice manager can update your business information and it will automatically be sent to your chosen business partners. Your business partners may be health service directories, online booking systems, communication services, hospitals, funders, primary health networks or others. This means your practice can maintain a single master copy of your organisation's details and your chosen business partners will automatically receive any updates.

Provider Connect Australia will save your organisation time, reduce human error, and remove the hassle of filling out multiple forms.

Watch this animation to [find out how to register with PCA](#) and start publishing information to preferred business partners.

For more information about Provider Connect Australia, including participating business partners and how to register [visit the Provider Connect Australia website](#)

NQPHN acknowledges the Aboriginal and Torres Strait Islander peoples as Australia's First Nation Peoples and the Traditional Custodians of this land. We respect their continued connection to land and sea, country, kin, and community. We also pay our respect to their Elders past, present, and emerging as the custodians of knowledge and lore.
