Saturday 2 March 2024 INTERPRETING RESEARCH FOR BUSY HEALTH PROFESSIONALS

ABOUT THE WORKSHOP

With the huge volume of papers published on any topic, and patients consulting "Doctor Google" and social media, many health professionals would like to feel more confident that they can access the best information for their clinical needs.

This is a one-day online workshop. It will provide guidance on what constitutes 'quality' in cohort studies, case-control studies, randomised controlled trials and systematic reviews.

The example studies for discussion will focus on maternity and newborn care and women's health, but will be relevant for participants from other disciplines.

LEARNING OUTCOMES

- Evaluate the quality of cohort and case-control studies and randomised controlled trials.
- Identify, analyse and discuss strengths and weaknesses in a variety of study designs.
- Interpret and evaluate the results of systematic reviews.
- Determine whether a study is applicable to your clinical context.
- Discuss whether it is appropriate to implement results from studies.

TOPICS

- History and overview of evidence-based medicine
- Types of study design/levels of evidence
- Fundamentals of cohort studies and case-control studies
- Top things to look for when reading a cohort study or a case-controlled study
- Fundamentals of randomised controlled trials
- Top things to look for when reading a randomised controlled trial study
- What if there are conflicting findings?
- Systematic reviews and meta-analyses

DEPARTMENT OF OBSTETRICS AND GYNAECOLOGY

Monash University's Department of Obstetrics and Gynaecology is Australia's leading research and teaching department in women's health and perinatal medicine. It is located on the premises of Monash Medical Centre, one of the five Monash Health campuses that has formed Victoria's largest provider of both maternity and gynaecology services.

FACILITATORS

Dr Mary-Ann Davey | RN, RM, DipAppSc(MCHN), BEd, GradDipSoc, DrPH, MEpi Dr Miranda Davies-Tuck | BBioMedSc(Hons), PhD Prof Ben Mol | MD, PhD, Bsc (Econ), BSc (Med), FRANZCOG Dr Rui Wang | MD, PhD Dr Wentao Li | MD, PhD (Public Health)

WHO SHOULD ATTEND

Obstetricians, Trainees, Midwives, Maternal and Child Health Nurses, GPs, Nurses, Paediatricians, Neonatologists, Allied Health Professionals, Researchers, Students

DATE/TIME

Saturday 2 March 2024 08:30 - 15:15 (AEDT)

DELIVERY METHOD

Live online via Zoom. Recordings will be made available to participants for 3 months after the course.

REGISTRATION

Early Bird Fee (ends 11 February 2024) Health Professionals \$280 Monash Health/University Staff \$220

<u>Standard Fee</u> (ends 28 February 2024) Health Professionals \$330 Monash Health/University Staff \$270

All prices include GST. Visit the website for additional price categories.
