

Demystifying Dementia course

For general practitioners and nurses working within primary care

Northern Queensland Primary Health Network (NQPHN), together with Dementia Training Australia invite general practitioners and nurses working within the NQPHN region to attend this two-part webinar series.

The Demystifying Dementia online course provides a practical and step-wise approach to improving knowledge, skills, and confidence in recognising, diagnosing, and managing dementia in the general practice setting.

Session one learning outcomes

- Recognise features of dementia and cognitive impairment.
- Explain the trajectory of dementia and cognitive impairment.
- Apply the inclusion and exclusion criteria frameworks in assessing patients for a possible diagnosis of Alzheimer's Dementia.

Session two learning outcomes

- Identify and address modifiable risk factors to help prevent, delay the onset, and slow the progression of dementia.
- Recognise the changing goals of care with the progression of dementia.
- Implement an effective management plan for people living with dementia.
