Simplify Chronic Disease Management with Inca Evo

Managing chronic disease has never been easier with Inca Evo. Our platform provides compliant tools for chronic disease management right on your GP desktop.

Create personalised documents effortlessly during patient consultations with all Medicare rules integrated into the system.

In a single click Inca Evo allows you to:

See patient eligibility and perform CDM activities

Use your own templates

Generate multiple, MBS compliant documents at once e.g. GPMP, TCA and EPCs

Automatically send documents to providers and patients

Save documents back to your PMS

Care plans prepared in under

Double your CDM billings in the first week!

MBS Rules Compliance

Inca Evo strictly adheres to Medicare rules and guidelines, ensuring all CDM activities are compliant.

Time Savings

Perform CDM tasks efficiently with simple actions and easily share information with care team members.

Enhanced Patient Care

Focus more on addressing key patient issues and less on documentation, leading to improved patient care.

Increased Billings

Identify missed opportunities for billing based on clinical indicators and billing history with point-of-care patient reporting.

Flexibility

Whether your clinic follows a nurse-led or GP-led approach, Inca Evo can adapt to any practice or workflow for effective chronic disease management.

Highest Security

Our data transport utilises secure SSL/TLS encryption, employing the same high-level security measures as leading banks and government agencies.
