

# Demystifying Dementia Course

## For general practitioners

*Nurses and clinical staff working within primary care practice are also welcome to attend*

Northern Queensland Primary Health Network (NQPHN), together with Dementia Training Australia, invite general practitioners, nurses, and clinical staff working in primary care practice across the northern Queensland region to attend this two-part webinar series.

The [Demystifying Dementia online course](#) provides a practical and step-wise approach to improving knowledge, skills, and confidence in recognising, diagnosing, and managing dementia in the general practice setting.

### Session one learning outcomes

- Recognise features of dementia and cognitive impairment.
- Explain the trajectory of dementia and cognitive impairment.
- Apply the inclusion and exclusion criteria frameworks in assessing patients for a possible diagnosis of Alzheimer's Dementia.

### Session two learning outcomes

- Identify and address modifiable risk factors to help prevent, delay the onset, and slow the progression of dementia.
- Recognise the changing goals of care associated with the progression of dementia.
- Implement an effective management plan for people living with dementia.
