

EOI Spirometry training courses

For general practitioners (GPs) and nurses working within general practices

Northern Queensland Primary Health Network (NQPHN) is seeking expressions of interest (EOIs) from GPs and nurses working in general practice in the northern Queensland region, interested in undertaking funded spirometry training.

Delivered by the National Asthma Council Australia, the Spirometry training course includes comprehensive training in the application, measurement, and interpretation of expiratory spirometry in general practice.

The six-hour interactive workshop provides a practical, hands-on component to allow participants to apply their knowledge in a real-world setting.

Learning outcomes

- Identify clinical indications where spirometry is recommended.
- Demonstrate the ability to correctly perform a spirometry test, using role play and peer review.
- Interpret spirometry results to differentiate between respiratory conditions, such as asthma and COPD.
- Assess your own practice quality assurance procedures for spirometry.

Expressions of interest close **4pm, Friday 7 February 2025.**

**Funded places for these courses are limited, with numbers capped at 18 individuals per workshop.*

Royal Australian College of General Practitioners (RACGP)
Allocated 6 hours for the 2023-2025 triennium.

Australian College of Rural and Remote Medicine (ACRRM)
Accredited by ACRRM as an educational event for 6 hours.
