

MyHealth app

My health app, available for mobile and tablet, lets you view key health information which have been uploaded to My Health Record.

Through this app, one can access their key health information that have been uploaded to My Health record such as medicine information history, pathology and imaging results, proof of vaccination history, Shared Health Summaries, Discharge summaries etc. You will need a myGov account linked to My Health Record and to have accessed your My Health Record at least once through a web browser.

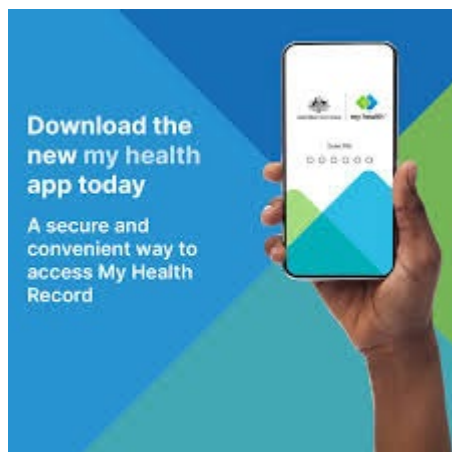

The app also lets you share documents that contain your health information with other people or organisation.

New functionality has been introduced that allows consumers to manage their electronic prescriptions and Active Script List. They will also have the ability to update and view emergency contacts information and will now be able to add, edit and view medicines, allergies and reactions.

You can download my health app from [App Store](#) or [Google Play](#).

my health app is an initiative of the Australian Government and is free.

Please check this step-by-step guide and videos- Getting started with the 'my health app'

NQPHN acknowledges the Aboriginal and Torres Strait Islander peoples as Australia's First Nation Peoples and the Traditional Custodians of this land. We respect their continued connection to land and sea, country, kin, and community. We also pay our respect to their Elders past, present, and emerging as the custodians of knowledge and lore.
