

# INCA

Providing patient-centred care across the healthcare industry.

[www.precedencehealthcare.com](http://www.precedencehealthcare.com) **1300 236 638**

## WHAT IS INCA?

Inca supports clinical workflows and the electronic sharing of health-related information between different healthcare organisations, between GP clinics, Allied Health and Hospitals.

Inca allows GPs to perform essential CDM documents such as assessments, health checks, medication reviews and care plans. GPs can also share patient information quickly and efficiently with other clinicians, leading to better healthcare outcomes. With Inca, clinicians can view a patient's complete medical history, including diagnoses, treatments, and test results, leading to better-informed decision-making and improved patient care.

## SOLUTION

Inca Supports:

- General Practice - Chronic Disease Management
- Mental Health
- Hospitals
- Aged care

## BENEFITS

### 1. Improved Patient Outcomes

Access to unique algorithms and real-time prompts to flag patients with chronic conditions improves patient outcomes

### 2. Cost Savings

Inca can help reduce healthcare costs by eliminating redundant testing and procedures. With access to a patient's complete medical history, clinicians can avoid ordering unnecessary tests and procedures.

### 3. Enhanced Care Coordination

Inca provides clinicians with real-time access to a patient's medical history. With this information, clinicians can work together to develop a comprehensive treatment plan

## AT A GLANCE

Inca currently maintains:

- 13k general practice users
- 40k allied health providers
- 23k specialists
- 200k patients
- 1.4 trillion data points on the platform

Medical Centre, Victoria*

"The beauty of [Inca] is that I don't have to generate dozens of forms, it all happens automatically, and I don't have to communicate with everyone separately."
