Best Practice Premier (BP)
Entering Bowel Screening (FOBT) Results

Bowel Screening data requires manual entry into BP for it to be recognised in search queries. The test name must contain 'FOBT' for it to be recognised as a Bowel screening test. The test result can be entered from the Patient record.

Note: Most NBCSP results should come in via Sonic Healthcare electronically (HL7 format), however, where results have not come in via this format, for example:

- Saving directly from NCSR

- Brought in as print-out by new patient

Results will need to be manually entered. Ensure that patients who have results available from the NCSR (even if it has been nominated from another healthcare provider) have their results entered correctly to ensure accurate data can be picked up by data extraction tools such as Primary Sense.

Step 1 - Download the FOBT Result from NCSR

1. Open the NCSR hub in BP.

2. Navigate to the patient NCSR history section and click 'open' in the 'action' column to view results.

3. Filter by bowel to view bowel cancer screening results and other correspondence.

4. Click the 'save' button to save the attachment to add to the investigation report.

Step 2 - Add FOBT Result data:

### From the Patient Record:

1. Select the **Investigation Reports** item on the menu (left of patient screen)

2. Select the **Add** button
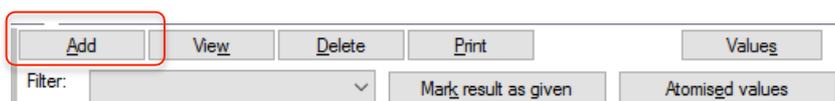

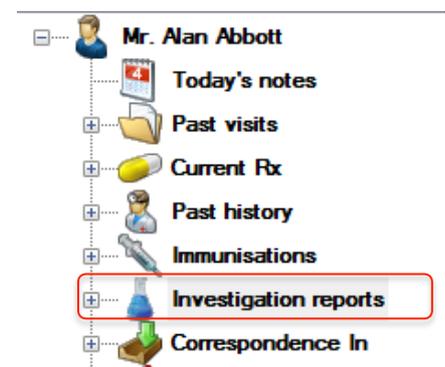

3. Enter the details of the FOBT Screening test:
   - Provider
   - Test name = *FOBT*
   - Date of test:
   - Notation:
   - Action to be taken
   - Has Been actioned
   - Checked By
   - Date Checked
   - Comments (if necessary)
   - Attach the report that was saved through the NCSR hub.

4. Select the **Save** button.
