

Cervical Cancer Screening

Demo Practice

10 February 2025 11:31

Which patients are included in this report?

What data is in this report?

How do we use this report?

Which patients are included in this report?

- Women marked as 'active' in the practice aged 25 to 74 yrs old who haven't had cervical screening in the past 5 years. Where available the date of the last screening is provided.
- The report synopsis shows the number of women due screening(those in the report), and those who are eligible and been screened within the past 5 years.
- It provides a count of those who have done the self-collect method (where data are available), and a count of patients where a HPV vaccination was found.

• There is also a count of those opted out/ineligible.

Where a total hysterectomy is recorded, these patients are counted as 'ineligible' in the report synopsis

• Please note 'no longer required' as an opt out is available from June 2024 on wards.

To keep patients off the report prior to this date, please select opt out instead (you can set it back to no longer required once saved in the record)

What data is in this report?

Evidence of cervical screening testing recorded in the pathology request, as a reason for the visit, and from the results coming back to the practice.

How do we use this report?

- The report can be used to identify patients with gaps in care.
- The results can be filtered by clicking on each column. Clicking on columns will rearrange the results alphabetically, chronologically or from high to low or low to high.
- The 'Search' function can help you find specific content
- The "Existing appt" column displays patient appointments that have been booked for dates beyond the report
- The 'Last Visit' column displays the date the patient last had an appointment at the practice
- The 'Remove' column provides the option to selectively remove individual patients from this type of report for the next twelve months.
- The report can be exported as an Excel or CVS file by clicking the 'Export To Excel' or 'Export to CSV' tabs
- All reports that are generated are automatically saved to a folder on your practice computer.
- The report can be printed by clicking the right mouse button while hovering the cursor over the report and selecting the 'print' option.

Report Synopsis

Patients due cervical screen testing in the practice across 30 day intervals

Note: Empty interval columns will populate over time.

Report-Related Data:

Patients Due Cervical Screen Testing : 8

Patients With Recent Screening : 6

Patients Self collected : 3

Patients With HPV Vaccine : 1

Patients Opted Out Or Ineligible : 2

Patients Due Cervical Screen Testing

Information about this table

Patients have been sorted by the most recent visit day, then by youngest to oldest. This is to target younger women into the program, and to indicate who may be actually attending your practice. You can use the tabs at the top of each column to reverse the ordering
