

# Child Immunisations

## Halloween Family Practice

23 April 2025 09:56

### Important

This report does not check patients for allergies to medication. Please check for any allergies before administering any vaccinations.

The report shows due dates in colours representing the timeframe of the vaccination.

- **N/A** = Vaccination is not required or no longer eligible
- **Green** = Vaccination has been given
- **Blue** = Vaccination is currently due now
- **Grey** = Vaccination date is upcoming, but not currently due

Due dates are **guidelines only** based on recommendations from the Department of Health and Aged Care.

Some vaccinations include an allowance for a catch-up schedule, recommended guidelines for these can be found here - [Catch-up vaccination](#).

Consider RSV Immunisation for infants up to 24 months after reviewing the maternal immunisations and child risk factors. Refer to the following guidelines: [Respiratory syncytial virus \(RSV\) | The Australian Immunisation Handbook](#).

Which patients are included in this report?

What data is in this report?

How do we use this report?

#### Which patients are included in this report?

- Patients between 0 and 5 years of age; and
- Who are currently due or have missed a vaccination

#### What data is in this report?

#### How do we use this report?

- This report lists patients who are due or missed a vaccination.
- The report has five tables split into age groups.
  1. 2 - 6 months vaccinations
  2. 6 months+ vaccinations (Influenza)
  3. 12 month vaccinations
  4. 18 month vaccinations
  5. 4 year vaccinations
- Due dates marked as '(Consider)' indicates when a patient may consider a vaccination based on their location and medical condition.
- The 'Search' function can help you find specific content.
- The 'Existing appt' column displays patient appointments that have been booked for dates beyond the report.
- The 'Last Visit' column displays the date the patient last had an appointment at the practice.
- The 'Remove' column provides the option to selectively remove individual patients from this type of report for the next twelve months.
- The report can be exported as an Excel or CSV file by clicking the 'Export To Excel' or 'Export to CSV' tabs.
- All reports that are generated are automatically saved to a folder on your practice computer.
- The report can be printed by clicking the right mouse button while hovering the cursor over the report and selecting the 'print' option.
