

# Patients missing PIP QI or accreditation Measures

Demo Practice

23 April 2025 10:01

## Patients without Accreditation Or PIPQI measures recorded

This table is a list of Active Patients who are missing one or more accreditation or PIPQI measures. N indicates not recorded. Where the patient meets RACGP Active definition of 3 visits in the past 2 years, that is shown. To prevent potential re-identification, patients aged over 90yrs are presented as 90yrs

You can search the doctor's name to generate a GP list, and you can click on the arrows by each column header to create lists for a missing measure. Exporting to excel will keep the selections made
