

GP education in eye presentations and emergencies

Expression of Interest (EOI)

Eye-related presentations are a common and often challenging component of general practice. Patients frequently present first to their GP with acute eye symptoms such as pain, redness, visual disturbance, or ocular trauma, and the GP plays a critical role in early assessment, triage, and management of these presentations.

This EOI is designed to gauge demand for face-to-face professional development focused on common eye presentations and ophthalmic emergencies in general practice.

The proposed event(s) will be delivered within the northern Queensland region, in collaboration with Optometry Australia.

Expressions of interest close **4pm, Friday 29 May 2026**.
